

LWA

LUXLIFE WEALTH ACCELERATOR

AI

BLUEPRINT

BUILD YOUR AI ASSISTANT.
BUILD YOUR FREEDOM.

WHO YOU ARE

WHO YOU HELP

YOUR VOICE

YOUR GOALS

YOUR DIRECTION

TRAIN IT. GUIDE IT. SCALE WITH IT.

Live life on your terms.

BEFORE WE OPEN YOUR AI TOOL

Let's get something straight.

- ✘ You are not sitting down to write a business plan.
- ✘ You are not trying to become an expert overnight.
- ✘ You are not expected to know exactly what you're doing.

You're building something different.

Over the next few modules, you're training your own AI assistant.

Think of it like hiring your first team member. If you hired somebody tomorrow and said:

“Help me create content.”

They'd probably stare at you like a confused golden retriever holding a laptop 🐕💻

Because they wouldn't know:

- Who you are.
- Who you help.
- How you talk.
- What matters to you.
- What your experiences are.
- What your goals are.

So that's exactly what we're doing here.

By the end of this Launch Strategy,
you'll have an assistant that knows:

- ✓ your story
- ✓ your personality
- ✓ your audience
- ✓ your content style
- ✓ your goals
- ✓ your message
- ✓ your business direction

And eventually you'll be able to
open your AI and say:

“What should I create today?”

And it'll actually know.

MODULE

1

MODULE 1

Let's Meet You First

Goal: Teach your assistant who you are.

✦ READ THIS FIRST ✦

Before your assistant can help you create content, write captions, brainstorm ideas, or support your business... it needs to understand who you are.

Think about it like this:

If you hired your first team member tomorrow and said:

“Help me create content.”

They'd immediately ask:

- ✓ Who are you?
- ✓ What matters to you?
- ✓ What have you been through?
- ✓ What are you trying to build?

That's exactly what we're doing.

You are not trying to sound smart.

You are not writing a perfect biography.

You are simply giving your assistant pieces of you.

And remember:

- ✓ There are no wrong answers.
- ✓ Messy answers are completely okay.

STEP 1: OPEN YOUR AI TOOL

Open:

- ✓ ChatGPT (free or paid)
- OR —————
- ✓ LuxBot (if available)

Either one works.

STEP 2: COPY + PASTE THIS

Paste this exactly as written:

“I want you to act as my personal AI assistant and coach.

I am building my online presence and creating something meaningful to me. I am still learning, so keep everything beginner friendly and avoid overwhelming me.

Ask me questions one at a time.

Your goal is to learn who I am so you can help me create content, ideas, messaging, and support later.

Please learn:

- my experiences
- my personality
- what matters to me
- my strengths
- my goals
- things I've gone through
- what I enjoy

Keep questions simple and conversational.”

MODULE 1

STEP 3: ANSWER NATURALLY

When AI starts asking questions:

- ✓ Don't overthink.
- ✓ Don't try to sound impressive.
- ✓ Don't write what you think you're "supposed" to say.

Answer like you're texting a friend.

Examples:

- ☞ "I'm a mom trying to create more flexibility."
- ☞ "I love helping people."
- ☞ "I've struggled with confidence."
- ☞ "I've always enjoyed health and fitness."
- ☞ "I want more freedom with my time."

Short answers are completely fine.

STEP 4: SAVE YOUR IDENTITY PROFILE

Once AI creates your summary:

Save it somewhere safe:

- ✓ Google Docs
- ✓ Notes app
- ✓ ChatGPT Project
- ✓ LuxBot saved chat

Label it:

✦ AI Blueprint Vault → Identity

WHAT YOU JUST DID

You didn't just answer questions.

You:

- ✓ started training your assistant
- ✓ created your first building block
- ✓ taught AI who you are

Next, we're going to teach your assistant:

who you naturally connect with and want to help

MODULE

2

MODULE 2

Who Feels Familiar?

Goal: Teach your assistant who you naturally understand and connect with.

★ READ THIS FIRST ★

- ✓ You do not need to pick a forever audience.
- ✓ You do not need to pick your entire future today.
- ✓ You are not putting yourself into a box.
- ✓ You're simply starting with people you understand.

Most people think:

"I need to figure out exactly who I help."

But usually the answer is much closer than you think.

Often it's:

- ✓ The person you used to be.
- ✓ The person struggling with something you've already experienced.
- ✓ The person sitting where you once sat.

Your assistant needs to understand this because content becomes much easier when you stop trying to talk to everyone.

STEP 1: OPEN YOUR AI TOOL

Open:

- ✓ ChatGPT (free or paid)
- OR
- ✓ LuxBot (if available)

Either one works.

STEP 2: COPY + PASTE THIS

Paste this exactly as written:

"Continue acting as my personal AI assistant and coach.

Use everything you've already learned about me.

Now I want you to learn who I naturally connect with and understand.

Keep everything beginner friendly and simple.

Ask me questions one at a time to help you understand:

- people I naturally relate to
- struggles I understand
- things I have learned through my own experiences
- topics I naturally enjoy talking about
- things I wish someone had helped me with earlier
- people I feel drawn to helping

After I answer, create:

1. Three possible audience directions that feel natural to me
2. Describe who each person is
3. Describe their struggles, goals, and emotions
4. Explain why each option fits me

Keep everything simple and confidence-building."

MODULE 2

STEP 3: ANSWER NATURALLY

When AI asks questions:

- ✓ Don't pick what sounds impressive.
- ✓ Don't pick what sounds profitable.
- ✓ Don't pick what someone else is doing.
- ✓ Pick what feels familiar.

Examples:

- ☞ "I understand moms who feel overwhelmed."
- ☞ "I understand people starting over."
- ☞ "I understand people struggling financially."
- ☞ "I understand people trying to build confidence."
- ☞ "I understand people trying to lose weight."

STEP 4: SAVE YOUR RESULTS

Save your audience profile somewhere safe:

- ✓ Google Docs
- ✓ Notes
- ✓ ChatGPT Projects
- ✓ LuxBot saved chats

Label it:

★ AI Blueprint Vault → Audience

WHAT YOU JUST DID

You didn't just pick an audience.

You:

- ✓ stopped talking to everyone
- ✓ found people you naturally understand
- ✓ taught your assistant who you're speaking to

MODULE

3

MODULE 3

How Do You Sound?

Goal: Teach your assistant how you naturally communicate.

★ READ THIS FIRST ★

- ✓ People do not connect with perfect. They connect with personality.
- ✓ Your voice is not about being louder. It is not about sounding smarter. And it definitely isn't about sounding like somebody else.
- ✓ Your voice is simply: How people feel when they hear you.

- ★ Some people are calm.
- ★ Some are direct.
- ★ Some tell stories.
- ★ Some are funny.
- ★ Some are motivating.
- ★ Some teach.
- ★ Most people are actually a combination.

Your assistant needs to learn this because eventually it'll help write content that sounds like YOU.

Not like a robot wearing a blazer and using words nobody says in real life.

STEP 1: OPEN YOUR AI TOOL

Open:

- ✓ ChatGPT (free or paid)
- OR
- ✓ LuxBot (if available)

Either one works.

STEP 2: COPY + PASTE THIS

Paste this exactly as written:

"Continue acting as my personal AI assistant and coach.

Use everything you've already learned about me.

Now I want you to learn how I naturally communicate and how I want people to feel when they interact with me.

Keep everything beginner friendly and simple.

Ask me questions one at a time to understand:

- how I normally talk
- how I want people to feel
- words that describe my personality
- communication styles I like
- communication styles I dislike
- creators or people I feel drawn toward and why
- whether I naturally lean more educational, motivational, storytelling, humorous, direct, supportive, or something else

After I answer, create:

1. My top three voice traits
2. A simple explanation of each one
3. Three words that describe my communication style
4. A short sample caption written in my natural voice
5. A second version written in a completely different tone so I can compare

Keep everything natural and realistic."

MODULE 3

STEP 3: ANSWER NATURALLY

When AI asks questions:

- ✓ Don't answer with what sounds "professional."
- ✓ Answer with what feels like **you**.

Examples:

- ☞ "I joke a lot."
- ☞ "I'm pretty direct."
- ☞ "I love telling stories."
- ☞ "I like making people feel understood."
- ☞ "I don't like sounding pushy."
- ☞ "I like keeping things simple."

STEP 4: SAVE YOUR RESULTS

Save your communication profile somewhere safe:

- ✓ Google Docs
- ✓ Notes
- ✓ ChatGPT Projects
- ✓ LuxBot saved chats

Label it:

✦ AI Blueprint Vault → Voice

WHAT YOU JUST DID

You didn't just define your voice.

You:

- ✓ taught your assistant how you sound
- ✓ made future content feel more natural
- ✓ started building consistency

Next we're going to teach your assistant:
what you actually want to create and where you're headed

MODULE

4

MODULE 4

What Are You Building?

Goal: Teach your assistant what you want to create and where you're headed.

READ THIS FIRST

- ✓ You do not need your entire future figured out today. Seriously.

Most people think they need:

- A perfect niche
- A perfect plan
- A perfect business model
- A perfect roadmap

You don't.

Right now we're simply giving your assistant a direction.

Think of it like putting an address into GPS.

You don't need to know every turn yet. You just need to know where you're trying to go.

Some people want:

- ✓ More freedom
- ✓ A side income
- ✓ To grow an existing business
- ✓ To create content
- ✓ To build a community
- ✓ To learn new skills
- ✓ To work with brands
- ✓ To help people
- ✓ To create multiple income streams

There is no wrong answer.

STEP 1: OPEN YOUR AI TOOL

Open:

- ✓ ChatGPT (free or paid)
- OR
- ✓ LuxBot (if available)

Either one works.

STEP 2: COPY + PASTE THIS

Paste this exactly as written:

"Continue acting as my personal AI assistant and coach.

Use everything you've already learned about me.

Now I want you to learn what I am trying to build and where I want to go.

Keep everything beginner friendly and avoid overwhelming me.

Ask me questions one at a time to understand:

- what I want my life to look like
- what goals matter most to me
- what excites me
- what I would love to create
- what kind of impact I want to make
- whether I want to educate, inspire, entertain, sell, support, create community, or something else
- what success would look like for me in the next 6 to 12 months

After I answer, create:

1. A simple direction statement for me
2. My main goals
3. My possible content themes
4. My possible content pillars
5. A short explanation of why these fit me

Keep everything simple, realistic, and confidence-building."

MODULE 4

STEP 3: ANSWER NATURALLY

When AI asks questions:

- ✓ Don't answer with what sounds biggest.
- ✓ Don't answer with what somebody online says you should want.
- ✓ Answer with what feels exciting to **you**.

Examples:

- ☞ "I want flexibility with my family."
- ☞ "I want to create content."
- ☞ "I want an additional income stream."
- ☞ "I want to help people feel less alone."
- ☞ "I want to work for myself eventually."
- ☞ "I want to build something that actually matters."

STEP 4: SAVE YOUR RESULTS

Save your direction profile somewhere safe:

- ✓ Google Docs
- ✓ Notes
- ✓ ChatGPT Projects
- ✓ LuxBot saved chats

Label it:

✦ AI Blueprint Vault → Direction

WHAT YOU JUST DID

You didn't just choose a direction.

You:

- ✓ gave your assistant a destination
- ✓ connected your goals to your content
- ✓ started building a roadmap

Next we're going to teach your assistant:
what type of content naturally fits you and your life

That transition matters because now AI knows:

Who you are → Who you understand → How you sound → Where you're going

MODULE

5

MODULE 5

What Feels Natural To Create?

Goal: Teach your assistant what type of content fits your personality and real life.

✦ READ THIS FIRST ✦

- ✓ You do not need to dance.
- ✓ You do not need to point at bubbles.
- ✓ You do not need to become somebody else online.
- ✓ There isn't one "right" kind of content.

- ✦ Some people love telling stories.
- ✦ Some people love teaching.
- ✦ Some people love making people laugh.
- ✦ Some people love showing behind-the-scenes moments.
- ✦ Some people like being on camera.
- ✦ Some people prefer voiceovers.
- ✦ Some like writing.
- ✦ Some like photos.

Your goal isn't to force content. Your goal is to discover what **feels natural**.

Because consistency becomes a whole lot easier when you stop trying to wear someone else's shoes.

STEP 1: OPEN YOUR AI TOOL

Open:

- ✓ ChatGPT (free or paid)
- OR
- ✓ LuxBot (if available)

Either one works.

STEP 2: COPY + PASTE THIS

Paste this exactly as written:

"Continue acting as my personal AI assistant and coach. Use everything you've already learned about me. Now I want you to learn what type of content naturally fits me and my lifestyle. Keep everything beginner friendly and simple. Ask me questions one at a time to understand:

- what types of content I enjoy watching
- whether I like talking, writing, teaching, storytelling, humor, showing my life, or something else
- whether I enjoy being on camera
- what feels uncomfortable
- what feels exciting
- what feels easiest for me to create
- what I naturally think I could stay consistent with

After I answer, create:

1. My recommended content style profile
2. Three content types that naturally fit me
3. Five content ideas based on everything you've learned about me
4. A beginner-friendly content plan I could start using immediately

Keep everything simple, realistic, and confidence-building."

MODULE 5

STEP 3: ANSWER NATURALLY

Remember:

- ✓ Do not answer based on what gets the most views.
- ✓ Answer based on what feels **sustainable**.

Examples:

- ☺ "I like talking more than writing."
- ☺ "I like telling stories."
- ☺ "I hate feeling scripted."
- ☺ "I like showing everyday moments."
- ☺ "I don't love being on camera yet."
- ☺ "I enjoy teaching things."

STEP 4: SAVE YOUR RESULTS

Save your content profile somewhere safe:

- ✓ Google Docs
- ✓ Notes
- ✓ ChatGPT Projects
- ✓ LuxBot saved chats

Label it:

✦ AI Blueprint Vault → Content Style

WHAT YOU JUST DID

You didn't just choose content ideas.

You:

- ✓ taught your assistant how you naturally create
- ✓ removed pressure to create like everyone else
- ✓ built content around your real life

Next we're going to teach your assistant:
**how all of this comes together into
your complete AI identity profile**

MODULE

6

MODULE 6

Bringing It All Together

Goal: Help your assistant connect everything it has learned into one complete identity profile.

★ READ THIS FIRST ★

Up until now, you've been giving your assistant information piece by piece.

You taught it:

- ✓ Who you are.
- ✓ Who you naturally connect with.
- ✓ How you communicate.
- ✓ What you're building.
- ✓ What type of content feels natural.

Now we're connecting all of those pieces together.

Think of it like putting together a puzzle.

You weren't collecting random answers. You were building a complete picture.

And now your assistant gets to step back and see all of it.

WHY THIS STEP MATTERS

You're not just giving AI information. You're building the foundation for content that feels like you, connects with your people, and supports the life you want.

STEP 1: OPEN YOUR AI TOOL

Open:

- ✓ ChatGPT (free or paid)
- OR
- ✓ LuxBot (if available)

Either one works.

STEP 2: COPY + PASTE THIS

Paste this exactly as written:

"Continue acting as my personal AI assistant and coach. Use everything you have learned about me so far. I now want you to organize everything into a complete profile that helps you better understand me. Please create a clear profile using the following sections:

- Who I am
- My experiences and strengths
- Who I naturally connect with
- My personality and communication style
- My goals and direction
- My content preferences
- My values
- Things that motivate me
- Things I want to avoid

After creating my profile:

1. Give me a simple summary about who I am
2. Explain what makes me unique
3. Explain what kind of content would naturally fit me
4. Explain how you would support me moving forward as my assistant

Keep everything simple, supportive, and beginner friendly."

MODULE 6

STEP 3: READ IT OUT LOUD

When AI gives you your profile:

Read it slowly.

Ask yourself:

"Does this actually sound like me?"

If something feels off:

- Change it.
- Remove it.
- Add to it.

You're teaching your assistant.
Not taking a personality test.

This step makes your profile accurate, helpful, and uniquely **YOU**.

STEP 4: SAVE YOUR RESULTS

Save your profile somewhere safe:

Google Docs

Notes

ChatGPT Projects

LuxBot saved chats

Label it:

AI Blueprint Vault → Master Profile

WHAT YOU JUST DID

You didn't just organize information.

You:

connected all the pieces together

helped your assistant recognize patterns

created your complete identity profile

Next we're going to teach your assistant:
how to think and create like you

That last line matters because now we're moving from memory mode into behavior mode, which is where the assistant starts becoming useful instead of just descriptive.

MODULE

7

MODULE 7

Teaching Your Assistant How To Think With You

Goal: Teach your assistant how to support you moving forward.

READ THIS FIRST

Your assistant now knows a lot about you.

It knows:

- ✓ who you are
- ✓ who you connect with
- ✓ how you communicate
- ✓ what you're building
- ✓ what content feels natural

But knowing information and knowing how to help are two different things.

Imagine hiring someone for your business. You wouldn't just hand them your life story and walk away.

You'd also tell them:

- 👤 "Here's how I like things done."
- 👤 "Here's what I need help with."
- 👤 "Here's what I don't want."

That's what we're doing now.

You're teaching your assistant how to work beside you.

This step turns information into meaningful support. You're not just sharing. You're creating a partnership.

WHY THIS STEP MATTERS

Because now your assistant understands not just who you are, but how to walk beside you and support you in the right way.

STEP 1: OPEN YOUR AI TOOL

Open:

- ✓ ChatGPT (free or paid)
- OR
- ✓ LuxBot (if available)

Either one works.

STEP 2: COPY + PASTE THIS

Paste this exactly as written:

"Continue acting as my personal AI assistant and coach.

Use everything you already know about me. Now I want to teach you how to best support me moving forward.

Keep everything beginner friendly and simple. Ask me questions one at a time to understand:

- what I want help with most
- things I struggle with
- things I overthink
- things that frustrate me
- things that make me feel motivated
- what kind of support helps me most
- how I like information explained
- what I want to avoid

After I answer, create:

1. My Support Profile
2. My Motivation Profile
3. My Learning Style
4. Things to remember when helping me
5. A simple explanation of how you will support me moving forward

Keep everything encouraging, simple, and realistic."

WHAT YOU'RE DOING HERE

You're giving your assistant direction. You're turning knowledge into action.

MODULE 7

Teaching Your Assistant How To Think With You

STEP 3: ANSWER NATURALLY

✓ **Don't answer based on** who you think you should be.

✓ **Answer based on real life.**
Be honest. Be you.

 **Examples of real answers:**

- "I overthink everything."
- "I need simple steps."
- "I learn better by doing."
- "I get overwhelmed by too much information."
- "I need encouragement sometimes."
- "I need things broken down simply."
- "I like examples."

This is not a test.

You're teaching your assistant how to truly support you.

STEP 4: SAVE YOUR RESULTS

Save your support profile somewhere safe:

- ✓ Google Docs
- ✓ Notes
- ✓ ChatGPT Projects
- ✓ LuxBot saved chats

Label it:

✦ AI Blueprint Vault → Support System

WHAT YOU JUST DID

You didn't just train your assistant.

You:

- ✓ taught it how you learn
- ✓ taught it how you work
- ✓ taught it how to support you

Next we're going to activate everything you've built into your complete **AI Brand Blueprint.**

YOU'RE BUILDING SOMETHING POWERFUL.

Keep going. You're doing amazing.

MODULE

8

MODULE 8

Teach Your Assistant About What You Offer or What To Build

Goal: Teach your assistant about your products, services, business, or opportunities.

READ THIS FIRST

Your assistant already knows:

- ✓ who you are
- ✓ who you connect with
- ✓ how you communicate
- ✓ what you're building

Now we want it to understand what you actually offer.

Don't worry if you don't have a product yet.

Some people have:

- products
- services
- affiliate offers
- MLM products
- coaching
- UGC services
- a small business
- a local business
- multiple income streams
- absolutely nothing yet

All of that is okay.

Your assistant can learn whatever you give it.

Think of this like introducing your assistant to your business.

BEFORE YOU START

If you already have something:

Gather one of these:

- ✓ Website description
- ✓ Product page description
- ✓ Sales page
- ✓ About page
- ✓ Company description
- ✓ Product details
- ✓ Product ingredients/features
- ✓ Your own explanation
- ✓ Notes about your business

Don't overthink this.
You do NOT need a perfect explanation.
Even a copy and paste works.

Examples:

- ... "I sell skincare products that help people simplify their routines."
- ... "I own a bakery that creates custom cakes and desserts."
- ... "I help women learn digital marketing."
- ... "I create UGC content for brands."
- ... "I promote wellness products through network marketing."
- ... "I don't have an offer yet but I'm interested in helping people with..."

STEP 1: COPY + PASTE THIS

"Continue acting as my personal AI assistant. Use everything you already know about me. Now I want you to learn about my products, services, offers, or business. I will either paste information from a website, product page, business description, company page, or explain it in my own words. First, review everything I provide. Then ask follow up questions one at a time if needed. Help me understand:

- what problems my offer solves
- who it helps
- why it matters
- what makes it useful
- how it naturally fits with my personality and audience

Afterward create:

1. My Offer Profile
2. A beginner-friendly explanation of what I provide
3. Messaging themes I can talk about naturally
4. Five content ideas connected to my offer

Keep everything simple and beginner friendly."

SEE WHAT HAPPENED THERE?

You removed:

"Describe your business from scratch."

And replaced it with:

"Go steal your own information from somewhere." 🤪

WAY EASIER.

WHY THIS STEP MATTERS

Your assistant can't support your offer unless it understands it.

The more context you give, the better the support you receive.

This helps your assistant:

- understand your message
- connect it to your audience
- create content that fits
- help you grow with clarity

The better your assistant understands your offer, the better it can help you communicate, create, and grow.

MODULE

9

MODULE 9

Teaching Your Assistant To Create With You

Goal: Teach your assistant how to create content that sounds like you and fits your life.

READ THIS FIRST ✨

Your assistant now knows a lot about you. It knows:

- ✓ who you are
- ✓ who you help
- ✓ how you communicate
- ✓ what you're building
- ✓ your goals
- ✓ your content style
- ✓ your offers

Now we're teaching it how to actually help you create.

Because creating content should not feel like staring at your screen thinking:

"What am I supposed to post today?"

Your assistant should help remove that pressure.

Not replace you.

Support you.

When AI understands how you create, content becomes easier, faster, and more **YOU**.

STEP 1: OPEN YOUR AI TOOL

Open:

- ✓ ChatGPT (free or paid)
- OR
- ✓ LuxBot (if available)

Either one works.

STEP 2: COPY + PASTE THIS

Paste exactly as written:

"Continue acting as my personal AI assistant. Use everything you already know about me. I want you to learn how to help me create content that feels natural, sounds like me, and fits my audience.

Keep everything beginner friendly and simple. Based on everything you know so far, create:

1. Five content pillars I naturally fit into
2. Five content themes I could repeatedly talk about
3. Ten beginner content ideas based on my personality, audience, and offers
4. Three video ideas
5. Three story post ideas
6. Three written post ideas
7. Explain why these fit me

Keep everything realistic and easy to create."

WHAT THIS STEP DOES

- ✓ Teaches your assistant how to ideate like you.
- ✓ Keeps your content aligned with your personality and offers.
- ✓ Removes the pressure of figuring it out alone.

YOU'RE BUILDING CONTENT THAT CONNECTS

The goal is not to post more.
The goal is to post what matters.
Let's make creating content feel simple, not stressful.

MODULE 9

Teaching Your Assistant To Create With You

STEP 3: REVIEW YOUR IDEAS

When AI gives you ideas:

Ask yourself:

- ✓ "Could I actually make this?"
- ✓ "Does this sound like me?"
- ✓ "Would I enjoy talking about this?"

You are not collecting random content ideas. You're teaching your assistant **your patterns**.

STEP 4: SAVE YOUR RESULTS

Save your content system somewhere safe:

- ✓ Google Docs
- ✓ Notes
- ✓ ChatGPT Projects
- ✓ LuxBot saved chats

Label it:

✦ AI Blueprint Vault → Content System

WHAT YOU JUST DID

You didn't just create content ideas.

You:

- ✓ created repeatable content categories
- ✓ removed "what do I post?" pressure
- ✓ taught your assistant how you create

You took ideas and turned them into a system that works **with you, not against you**.

WHAT'S NEXT?

Next we're building:

your complete AI Brand Blueprint and activating your assistant

REMEMBER:

Your assistant is becoming more powerful with every step because you're teaching it to think, create, and support you like a true partner.

MODULE

10

MODULE 10

Create Your AI Brand Blueprint

★ **Goal:** Create your complete AI Brand Blueprint and activate your personal AI assistant. ★

READ THIS FIRST

You made it.

Over the last modules, you weren't just answering questions.

You were training your assistant.

You taught it:

- ✓ who you are
- ✓ who you naturally connect with
- ✓ how you communicate
- ✓ what you're building
- ✓ what content feels natural
- ✓ what you offer
- ✓ how you learn and work best

NOW WE'RE BRINGING EVERYTHING TOGETHER.

This is where your assistant stops feeling like a blank chat box and starts becoming something built around **YOU**.

Think of this as your digital foundation.

IF YOU EVER:

- start a new ChatGPT chat
- create a Project
- use LuxBot
- switch AI tools
- lose chat history
- want a fresh start

You can use your AI Brand Blueprint and immediately give your assistant context again.

No starting over.

No rebuilding.

No reteaching.

WHAT YOU'RE CREATING:

Your Own AI Assistant

A Reusable Business Asset

Freedom from Starting Over

A System That Grows With You

An Assistant That Understands You

You now have an assistant that understands:

- ✓ Who you are.
- ✓ Who you're here to help.
- ✓ How you naturally communicate.
- ✓ What you're building.
- ✓ And how to support you moving forward.

Welcome to your 
**AI Brand
Blueprint**

YOU DIDN'T JUST COMPLETE A WORKBOOK. YOU BUILT YOUR DIGITAL ADVANTAGE. 

MODULE 10

Create Your AI Brand Blueprint

STEP 1: OPEN YOUR AI TOOL

Open:

✓ ChatGPT (free or paid)

OR

✓ LuxBot (if available)

Either one works.

STEP 2: COPY + PASTE THIS

Paste exactly as written:

You now have everything you've learned about me throughout this process.

Create my complete AI Brand Blueprint.

Organize it into these sections:

WHO I AM

Include:

- personality
- experiences
- strengths
- values
- goals

WHO I HELP

Include:

- audience
- struggles
- desires
- emotions

HOW I COMMUNICATE

Include:

- voice traits
- tone
- communication style
- things that feel natural to me

MODULE 10

Create Your AI Brand Blueprint

WHAT I AM BUILDING

Include:

- goals
- direction
- content themes
- content pillars

MY OFFERS OR BUSINESS

Include:

- products/services
- what they solve
- who they help

CONTENT PROFILE

Include:

- content styles I naturally fit into
- content ideas
- storytelling themes
- content strengths

SUPPORT PROFILE

Include:

- how I learn
- what motivates me
- what overwhelms me
- things to avoid

FINAL COPY + PASTE STARTER PROMPT

Called:

MY AI BRAND BLUEPRINT

You are my personal AI assistant.
Use everything you know about me.
Here is my complete AI Brand Blueprint:

[WHO I AM]

•

[WHO I HELP]

•

[HOW I COMMUNICATE]

•

[WHAT I AM BUILDING]

•

[MY OFFERS OR BUSINESS]

•

[CONTENT PROFILE]

•

[SUPPORT PROFILE]

•

Use this to understand who I am, who I help, how I communicate, what I'm building, and how to support me moving forward. Help me create content, offers, and strategies that fit me and my audience. Keep everything aligned with my voice, goals, and vision. Let's create and grow together.

I'M YOUR PERSONAL AI ASSISTANT

Here's what I understand about you:

Who You Are

You are a determined, growth-minded individual who is building a better future for yourself and possibly your family. You are authentic, relatable, and value simplicity and connection.

Who You Help

You help people who want to improve their lives, solve problems, and create more freedom, confidence, and success.

How You Communicate

You communicate in a natural, honest, friendly, and simple way. You prefer real conversations over complicated or overly formal language.

What You Are Building

You are building a brand and business around helping others, creating content, and offering solutions that make a difference.

How I Will Support You

I will support you by saving you time, giving you ideas, creating content, helping you stay consistent, and supporting your growth every step of the way.

MY AI BRAND BLUEPRINT

You are my personal AI assistant.
Use everything you know about me.
Here is my complete AI Brand Blueprint:

[WHO I AM]

•

[WHO I HELP]

•

[HOW I COMMUNICATE]

•

[WHAT I AM BUILDING]

•

[MY OFFERS OR BUSINESS]

•

[CONTENT PROFILE]

•

[SUPPORT PROFILE]

•

Use this to understand who I am, who I help, how I communicate, what I'm building, and how to support me moving forward. Help me create content, offers, and strategies that fit me and my audience. Keep everything aligned with my voice, goals, and vision. Let's create and grow together.
